Andrii Kysil

AI Product Builder | AI-Assisted Development | Rapid Prototyping

Prague, Czech Republic | +420 723 088 317 | a.keycell@gmail.com | https://www.linkedin.com/in/andriikysil/ | https://x.com/rollie1212

PROFILE

Product-oriented AI builder with experience translating business and user needs into structured product flows, requirements, prototypes, documentation and launch-ready concepts. Uses ChatGPT, Claude, Gemini, Codex-style workflows and Google AI Studio to design, test and iterate products quickly. Strong background in cross-functional delivery, user onboarding, community-led product adoption and technical communication. Not positioned as a traditional software engineer; strongest at product discovery, AI-assisted implementation and connecting business goals with practical delivery.

CORE CAPABILITIES

AI product development

- AI-assisted product development
- Rapid MVP prototyping
- Prompt engineering
- LLM application design
- RAG-based assistants
- AI workflow design

Product and delivery

- Product discovery
- Use-case prioritization
- User journeys
- Requirements definition
- User stories and acceptance criteria
- Product documentation
- Feature planning

Technical working knowledge

- REST API concepts and integrations
- JSON
- Git and GitHub
- n8n workflow testing
- AI-assisted debugging
- Web and Telegram product workflows

Business and collaboration

- Business process analysis
- Stakeholder communication
- Cross-functional coordination
- Product adoption
- Community feedback loops
- GTM and content workflows

EXPERIENCE

Community Lead / Product Community Manager

Chainway Labs - Citrea | Remote | Nov 2024 - Jul 2026

- Translated technical product updates into clear onboarding, support and communication flows for a global user base.
- Designed structured campaign and verification journeys with role progression, task logic and contributor segmentation.
- Worked across product, engineering and marketing teams to clarify requirements, document processes and surface recurring user issues.
- Used AI tools to accelerate documentation, product messaging, support drafts and technical task framing.
- Converted community feedback into actionable product, support and onboarding improvements.

Community Manager / Marketing & Delivery Coordinator

Scribe | Remote | Jan 2024 - Nov 2024

- Coordinated campaign delivery, user communication, partner activities and product onboarding across Web3 client projects.
- Converted project goals into task mechanics, delivery checklists, moderation guidelines and user-facing messaging.
- Supported distributed teams in fast-changing product environments and used AI tools to speed up content and documentation.

Community Manager / Marketing

Fuji DAO | Remote | Nov 2022 - Jan 2024

- Explained complex DeFi lending and borrowing concepts in accessible language for users.
- Coordinated AMAs, user education and community operations across Discord and social channels.
- Collected user feedback and surfaced product, support and communication needs to the wider team.

Founder / Product & Growth Lead

CryptoBrewMaster | Kyiv / Prague | Jan 2020 - Present

- Developed a multichain game concept combining product vision, user flows, community building and growth strategy.
- Owned product storytelling, feature concepts, onboarding and cross-channel engagement.
- Worked across product, marketing and community responsibilities in an early-stage environment.

SELECTED AI & PRODUCT WORK

FootRoll AI

AI football prediction product

Designed a Telegram-based football prediction product covering major competitions, including prediction formats, free and paid access logic, subscription concepts and acquisition flows.

Contribution: Product concept and feature design; Telegram user journey; Monetization and subscription logic; AI-assisted product and content workflows

Prediction Market Prototype on Citrea Testnet

Web3 product prototype

Defined product logic for sports and event markets, including market creation, betting options, resolution flows, payouts, refunds, admin controls and frontend behavior.

Contribution: Product requirements; User and admin flows; Smart-contract behavior specification; AI-assisted debugging and iteration

AI Content Production Workflows

Repeatable GenAI content system

Created reusable prompt-driven workflows for social posts, short-form video scripts, campaign communication and product documentation using modern AI creator tools.

Contribution: Prompt systems; Content workflows; AI video and image tooling; Cross-platform adaptation

Smart Instagram LED Counter

Hardware and software prototype

Designed a five-panel LED follower counter concept combining an Instagram data source, microcontroller logic, enclosure design and 3D-printable parts.

Contribution: Product concept; Hardware and software requirements; API integration planning; AI-assisted technical problem solving

Restogen AI

Working AI product

Working AI product and prototyping initiative focused on AI product building, workflow design, AI-assisted prototyping, documentation and iteration.

Contribution: AI product building; Product and workflow design; AI-assisted prototyping; Documentation and iteration

TOOLS

AI

ChatGPT | Claude | Gemini | Google AI Studio | Codex-style workflows | GitHub Copilot concepts | InVideo | HeyGen

Product

Product requirements | User stories | Acceptance criteria | Process mapping | Knowledge-base creation

Technical

REST API concepts | JSON | GitHub | Git basics | n8n - tested / working knowledge | Discord and Telegram bots | Web3 wallets and smart-contract product logic

Platforms

Discord | Telegram | Guild.xyz | X / Twitter | Farcaster | YouTube and short-form video platforms
